

# Tesla Air Conditioning

Let us present advanced technology in service of your desired room temperature: Tesla air conditioners, inspired by your everyday needs and favorite spaces.

Regardless of the season, Tesla AC units will provide you with a perfectly comfortable atmosphere, allowing you to enjoy every moment with the people you love.

# Fresh O2 model

# Fresh air

Does the air feel stale and stuffy when your AC works for a long time? Not anymore, as the new design of this Tesla model allows outside air intake of up to 30 m<sup>3</sup>/h! Even when you're not using it in cooling or heating mode, you can opt for Fresh air feature that helps filtrate the air coming from outside. .

# HEPA filter

HEPA H11 filter successfully removes PM 2.5 particles, fine dust, microbes and pollen.

# Smarter design

Thanks to the new louver design, you can opt for standard air dispersing position or choose between specific ones: Gentle Cool Wind, Blanket-Style Air Flow, Shower-Style Air Flow or Encircled Air Flow.

# Easy cleaning

If you want to clean the filters, you can now do it in a couple of simple steps: easily disassemble your AC, replace the HEPA filter and clean the mesh filter, and then reassemble your device.

## Smart light sensor

If the built-in light sensor detects weaker light intensity for a while, the display will turn off automatically. In case of remote control or app activity, the display will light up softly and the buzzer will gently beep. When the AC detects that the ambient light is strong for some time, it will exit this mode.

## Wi-Fi feature

Wi-Fi feature means that Tesla air conditioner can also be controlled with mobile phones or other smart devices: an option that adds to your everyday convenience and comfort!

# Other Features

# UV lamp

Ultraviolet light offers additional assistance while fighting against unwanted microorganisms. Emitting waves of up to 285 nm, it helps in creating virus and bacteria-free area without negative side effects.

## Additional health: Ionizer filter

A certain level of ion saturation makes harmful microorganisms in the air fall to the ground, reducing chances of people inhaling them. Devices with an ionizer can be extremely useful for those suffering from allergies.

## Additional health filter: Lysozyme

This AC uses a new type of lysozyme filter, which helps with ensuring air quality. When air goes through the filter, the latter can destroy harmful bacteria and viruses.

# Self- diagnostic

The air conditioner is able to monitor its operations and identify problematic or faulty parts automatically. If that happens, a fault code appears on the display, making maintenance easier and more efficient.

# Efficiency: on

A high frequency compressor helps your AC unit to start producing cooler or warmer air faster: down to 18°C in just 30 seconds, or up to 40°C in 60 seconds. This way, you can quickly enjoy preferred room temperature.

# Gentle air flow

Specific louver design allows for cool air to go through micro holes, there to help generate gentler air flow coming from the air conditioner. Say goodbye to harsh cold wind, and welcome a soft flow from your AC unit!
